OpenEar

Open-ear sports headphones, tested by athletes, delivered across Lebanon

About us

OpenEar is a Lebanese online store for open-ear sports headphones. Open-ear headphones sit outside the ear instead of inside it, so you hear your music and the world around you at the same time: cars, bikes, other runners and your coach. We sell a short list of models that our own team has tested on real runs, rides and swims, and we deliver them anywhere in Lebanon.

Mission

To give athletes a seamless music experience: headphones that fit comfortably, never fall out mid-workout, survive sweat, rain and water, and keep your ears open so you stay safe outdoors.

Products and prices

Product	Price	Best for	Key specs
OpenEar Stride	$79	Everyday runners, entry level	Air conduction, 8h battery, IP55 (sweat and rain), 28 g, black or grey
OpenEar Pace Pro	$129	Serious runners, trail, cycling	Bone conduction, 10h battery, IP67, 26 g, dual microphones for calls, black, red or blue
OpenEar Swim	$159	Swimmers, triathletes	Bone conduction, 32 GB built-in MP3 storage, IP68 up to 2 m, 8h battery
OpenEar Ultra	$189	Ultra and long-distance	Bone conduction, 16h battery, IP67, quick charge (10 min = 2h), ear-hook lock
Sport Fit Kit	$15	Accessory, all models	Spare silicone hooks, swimming earplugs, carry pouch

OpenEar Stride ($79)
Our entry model for people who run a few times a week. It uses air conduction, which gives fuller bass than bone conduction, and handles sweat and rain (IP55). It is not made for swimming. Available in black or grey.

OpenEar Pace Pro ($129)
Our most popular model. Bone conduction, a secure wraparound fit that stays put on trails and on the bike, IP67 dust and water protection, and dual microphones so you can take calls mid-run. Available in black, red or blue.

OpenEar Swim ($159)
Built for the pool and open water. Bluetooth does not travel through water, so the Swim stores up to 32 GB of your own MP3 files and plays them directly. Waterproof to IP68, up to 2 m deep. Wear it with the earplugs from the Sport Fit Kit for the best sound in the water.

OpenEar Ultra ($189)
For long days on your feet. A 16-hour battery covers a full ultramarathon, 10 minutes of charging gives 2 hours of play, and the ear-hook lock keeps the headphones in place on technical, rocky terrain.

Sport Fit Kit ($15)
Spare silicone hooks in two sizes, a pair of swimming earplugs and a zip carry pouch. Fits every OpenEar model.

Delivery and payment

• Beirut and Mount Lebanon: delivered within 24 hours.
• Rest of Lebanon: 2 to 3 days.
• Delivery fee: $4, free on orders over $100.
• Payment: cash on delivery or card.

Warranty and returns

Every headphone comes with a 1-year warranty against manufacturing defects. Unused items in their original packaging can be returned within 14 days of delivery for a full refund.

• Our team replies within one working day.

How we test

No model goes on the store until our team has used it on real training: road runs, trail runs, rides and pool sessions. We check that it stays in place, survives sweat and water, lasts the advertised battery time and lets you hear traffic clearly. If a model fails our testing, we do not sell it.

Team

Rami Haddad, Co-founder, Head of Product. A marathon runner who has trained on Lebanon's roads for over ten years. Rami leads product testing and decides which models make it onto the store.

Lea Khoury, Co-founder, Head of Operations. A triathlete who swims, rides and runs every week. Lea runs operations, delivery and customer service, and makes sure every order arrives fast.

Why OpenEar

• **Athletes selling to athletes:** every model is tested by real athletes who use them every day.
• **Fast local delivery:** 24 hours in Beirut and Mount Lebanon, instead of weeks of waiting for an import.
• **A short, honest list:** five products we stand behind, not hundreds of untested listings.
• **Safety first:** open-ear design keeps you aware of traffic while you train outdoors.

Frequently asked questions

Can I wear OpenEar headphones with a helmet or sunglasses?
Yes. All models sit in front of the ear and work with cycling helmets and sport sunglasses.

Which model should I choose?
Stride for casual running, Pace Pro for serious running, trail and cycling, Swim for the pool and

triathlon, and Ultra for long-distance and ultra events.

Can I take calls?
Yes, on the Pace Pro, which has dual microphones.

Can I stream music while swimming?
No headphone can stream Bluetooth underwater. The OpenEar Swim plays MP3 files stored on the headphones instead.

How do I charge them?
Every model charges with the included magnetic USB cable.
